Education

Maulana Abul Kalam Azad University of Technology (MAKAUT)

- Bachelor of Computer Application (BCA)
- 2024 Passout • CGPA - 7.50/10

Kolkata, India
August 2021 - July 2024

Techno India University

- Master of Computer Applications (MCA)
- 2024 to 2026 batch • Currently attending

Kolkata, India
August 2024 - July 2026

Skills

- Language** Java, JavaScript, Python, SQL
- Frameworks** React Native, React.js, Next.js
- Tools** Git/GitHub, Redux Toolkit, TypeScript, JWT / bcrypt, Postman
- Technologies** Node.js, Express.js, Docker, MongoDB, MySQL, OOPs, AWS S3, Render
- Soft Skills** Team Management, Deliver results, Scalability Focused, Designing, Creativity, Excellent communication

Work experience

Full-Stack Developer - STRENGTHVERSE PRIVATE LIMITED

June 2024 - June 2025

Authentication Layer – Built a secure, scalable JWT-based authentication system using React Native, TypeScript, Redux Toolkit, Node.js, Express, and MongoDB. Implemented bcrypt password hashing and OTP email verification.

- Supported email/username login, forgot-password flow, and location-based access. Added a tempUser model for incomplete signups and enabled dual user types (user | page)..
- Optimized frontend using centralized Redux state, used Expo Router for eliminating prop drilling and improving performance.

Full-Stack Developer - STRENGTHVERSE PRIVATE LIMITED

June 2024 - June 2025

Modular Settings System – Built a scalable 3-part settings architecture (Edit Profile, Edit Overview, General Settings) using React Native, TypeScript, Redux RTK Query, Zod, Node.js, and AWS S3.

- Edit Profile: Allowed users/pages to update personal info (name, username, location, media, etc.), with rules like DOB editable once/year and unit toggles for height/weight. Pages can link websites.
- Edit Overview: Created a dynamic, backend-configurable system for adding sports and role-based metadata (e.g., batting style, bowling type). Also supports "About Us" editing.
- General Settings: Added key actions like change password, close account, feedback, logout, and app sharing.
- Ensured reusable, type-safe code with Redux RTK Query, Zod, and Expo Router for smooth, efficient navigation.

Full-Stack Developer - STRENGTHVERSE PRIVATE LIMITED

June 2024 - June 2025

Gamified Feedback System – Built an interactive, gamified feedback flow using React Native, Redux, JavaScript, TypeScript, Expo AV, Node.js, Express, and MongoDB.

- Displayed 5 dynamic questions (4 MCQs, 1 text) with transitions, sound effects, and a clean, responsive UI.
- Designed a “Create Once, Manage from Anywhere” Approach, update questions/options its quantity without code changes.
- Enabled repeatable submissions with a live feedback counter per user/page.
- Focused on code reusability, clean architecture, and dynamic rendering to keep the feature modular and easily maintainable.

Projects

Qilin - E-Commerce app

[GitHub Link](#)

- Built a scalable MERN-based mobile app using React Native, TypeScript, Redux Toolkit, Node.js, Express, and MongoDB (MVC).
- Designed a dynamic DB-driven selling form supporting both manual entry and AI-assisted completion. Implemented a smart image-based AI pipeline using OpenAI with prompts generated from DB questions, producing accurate material/quality/brand predictions even from unclear images.
- Maintained a single source of truth by using one question model for both UI rendering and AI prompts ensuring “change once, update everywhere.” Added a product preview ➔ live listing flow with multi-image support, category filtering, and clean, reusable backend services.

Interests

- Problem Solving, Creativity, Designing, Ui & Ux
- Addition Tools - Figma, Lucid Chart, ClickUp
